FENÊTRES SUR LE PAYSAGE

AN ARTISTIC AND CULTURAL ADVENTURE

***Fenêtres sur le paysage* brings together the history of our heritage and the reality of the the modern world. This trail is characterised by three major types of artistic creation, for now along the GR®65, and soon to be seen in other European countries.**

⊙

A collection of permanent artworks-cum-shelters arising from the earth, and of traditional skills

Artists are invited to create artworks-cum-shelters related in some way to the local area and to those who live there, in order to offer both local people and walkers the chance to (re)discover the landscapes of these St. James' Ways.

These artworks-cum-shelters :

- are open to walkers and local people for them to enjoy an exceptional artistic experience in the countryside ;
- have a use : a shelter, a place in which they can rest, take shelter or spend a night ;
- are built using local materials and traditional skills, with particular attention paid to the landscape and to the values associated with ecological transition.

Teams of artists invited to contribute

⊙ Encore Heureux, Abraham Poincheval, Elias Guenoun, Sara de Gouy, Observatorium...
✳ Cie Carabosse, Luke Jerram... △ La Fausse compagnie / Sonothèque nomade.
Fred Sancère, Julien Choppin, Pierre de Mecquenem and Encore Heureux.

✳

Artistic creations distributed along the ways

Contemporary works mixing installations in the landscape, walks, shows and opportunities for meetings and exchanges. In their texts, their diffusion or their way of encouraging participation, they invite the public to explore or to see the St. James' Ways in a new light, by reinforcing their festive dimension and the fact that they belong to everyone.

△

In-situ creations

- *À vol d'oiseau*, an itinerary with sound effects, composed of nesting boxes broadcasting unexpected songs, providing walkers with a poetic halt to listen to the songs collected all along the Way from local people... and from birds.
- *Les citernes-lits* (water-tank beds) take objects from the world of agriculture and transform them into shelters, thus literally providing an amusing immersion in the landscape of the Ways.

A COLLECTIVE ADVENTURE

Bringing together

participants from different horizons and with various concerns - artistic, environmental and tourism-related.

Constructing

with the inhabitants of and visitors to the areas crossed by the Compostela Pilgrim Ways.

Creating links

to encourage the circulation of ideas, the arts and culture in France and in Europe.

THE COMPOSTELA WAYS

Far from being just a long-distance footpath or a tourist route, the Saint James Ways bear witness to a European-wide phenomenon. Classed by the Council of Europe as cultural itineraries, they are also on the UNESCO World Heritage list in respect of their exceptional universal value.
In France, five main routes spread across the country. The most used, the GR®65, links Geneva with the Basque country.

STAKEHOLDERS IN LOCAL AREAS

Saint-Alban-sur-Limagnole, Nasbinals :
Scènes croisées de Lozère, CC Terres d'Apcher-Margeride-Aubrac
Espeyrac, Espalion, Golinhac :

Complementary in both their approach and in what they do, together they are supporting the *Fenêtres sur le paysage adventure*.

DERRIÈRE LE HUBLOT, SCÈNE CONVENTIONNÉE D'INTÉRÊT NATIONAL

Operates from Capdenac-Gare on a day-to day basis in rural areas to invent and share with artist(e)s, local stakeholders and inhabitants a unique artistic and cultural project whose main constituents are exchanges, encounters, providing access to discoveries and artistic practices and participation in the cultural dynamic of the area.

THE COMPOSTELA WAYS AGENCY

A national, professional and secular association, the Agency brings together local authorities, associations, accommodation providers and Tourist Offices. It acts to develop the Compostela Ways and to encourage cultural tourism. In company with the State, it promotes and manages the property «the Santiago de Compostela Ways in France» which is UNESCO World Heritage listed.
